>_ // WEBINAR INTRO : CYBERSECURITY DOMAINS

Cybersecurity Is NOT Just Hacking.

14+ domains. One unified goal: Protecting the digital world.

[ICEBREAKER QUESTION]
"When you hear the word 'cybersecurity', what is the first career or image that pops into your mind?"

Target Audience: College Freshers & Tech Enthusiasts

Status: Live Interactive Session

01 / OVERVIEW

The Cybersecurity Map

7 Key Functional Pillars

Offensive Sec
Pen Testing, OSINT, Red Teaming

Defensive Operations
SOC, Blue Team, Network Security

App & Web Security
Web Sec, AppSec, Secure Coding

[CYBERSECURITY CORE]

Protecting Data • Defending Systems • Preventing Breaches

Investigation
DFIR, Forensics, Malware Analysis

Cloud & DevOps
Cloud Sec, DevSecOps Automation

Identity & Governance
IAM, Cryptography, GRC, Architecture

02 / DOMAIN FOCUS

Offensive Security & Reconnaissance

THE RED TEAM

DOMAIN 01

Penetration Testing

Ethically attacking systems to find security weaknesses before malicious hackers exploit them.

WHAT PEOPLE ACTUALLY DO:

Recon → Exploit → Report

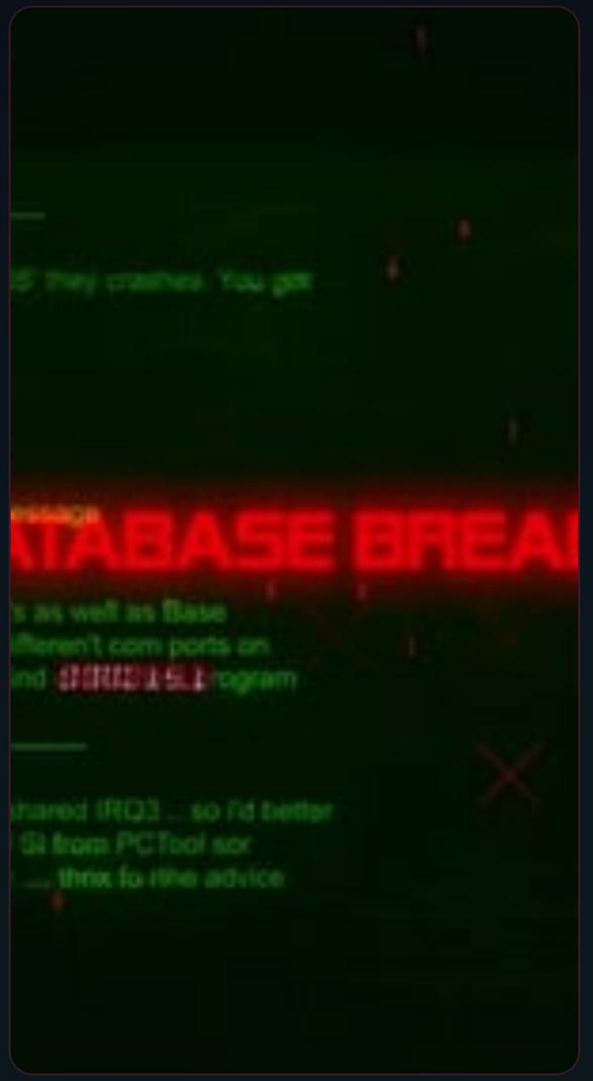

DOMAIN 02

OSINT (Open-Source Intel)

Gathering publicly available information to map target attack surfaces and digital footprints.

WHAT PEOPLE ACTUALLY DO:

Search → Correlate → Map

03 / DOMAIN FOCUS

Defensive Operations & Network Security

THE BLUE TEAM

DOMAIN 03

SOC / Blue Team Operations

Monitoring live enterprise traffic and responding immediately to suspicious alerts.

WHAT PEOPLE ACTUALLY DO:

Monitor → Detect → Contain

DOMAIN 04

Network Security

Securing internal data traffic, firewalls, and routers to stop unauthorized network access.

WHAT PEOPLE ACTUALLY DO:

Filter → Inspect → Enforce

04 / DOMAIN FOCUS

Incident Investigation & Forensics

DIGITAL DETECTIVES

DOMAIN 05

Digital Forensics (DFIR)

Investigating digital crime scenes to piece together how an attacker breached a system.

WHAT PEOPLE ACTUALLY DO:

Isolate → Analyze → Reconstruct

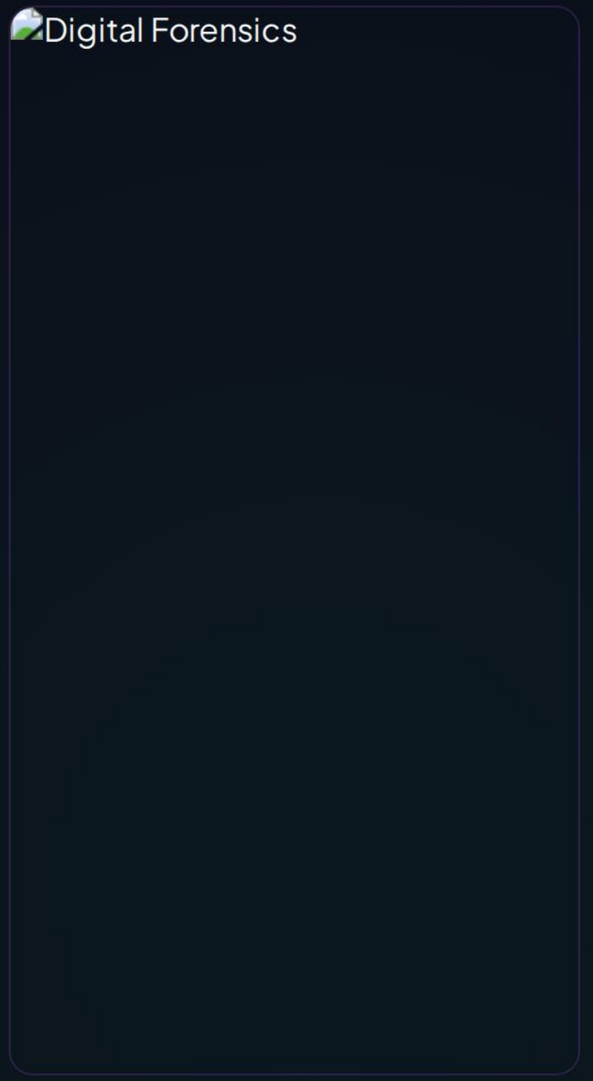

DOMAIN 06

Malware Analysis

Reverse-engineering malicious software in safe sandboxes to understand its behavior.

WHAT PEOPLE ACTUALLY DO:

Decompile → Sandbox → Neutralize

05 / DOMAIN FOCUS

Web & Application Security

BUILDING SECURE SOFTWARE

DOMAIN 07

Web Security

Protecting websites and web APIs against common flaws like SQL Injection and Cross-Site Scripting (XSS).

WHAT PEOPLE ACTUALLY DO:

Audit → Sanitize → Shield

DOMAIN 08

Application Security (AppSec)

Embedding security reviews and code scanning early into developer codebases.

WHAT PEOPLE ACTUALLY DO:

Review Code → Test → Patch

06 / DOMAIN FOCUS

Cloud Security & DevSecOps

MODERN INFRASTRUCTURE

DOMAIN 09

Cloud Security

Securing virtual servers, databases, and multi-cloud environments (AWS, Azure, GCP).

WHAT PEOPLE ACTUALLY DO:

Configure → Harden → Monitor

DOMAIN 10

DevSecOps

Automating security checks seamlessly into CI/CD deployment pipelines.

WHAT PEOPLE ACTUALLY DO:

Automate → Scan → Deploy

07 / DOMAIN FOCUS

Identity & Cryptography

THE ACCESS GUARDS

DOMAIN 11

Identity & Access (IAM)

Ensuring the right users have access to the right resources (SSO, Multi-Factor Auth).

WHAT PEOPLE ACTUALLY DO:

Authenticate → Authorize → Audit

DOMAIN 12

Cryptography & Data Sec

Scrambling sensitive information into unbreakable code mathematically at rest and in transit.

WHAT PEOPLE ACTUALLY DO:

Encrypt → Hash → Manage Keys

08 / DOMAIN FOCUS

Architecture & Governance

STRATEGY & COMPLIANCE

DOMAIN 13

Security Architecture

Designing the high-level security blueprints and Zero-Trust frameworks for entire organizations.

WHAT PEOPLE ACTUALLY DO:

Model → Design → Validate

DOMAIN 14

Governance, Risk & Compliance (GRC)

Ensuring company security policies comply with government regulations (GDPR, ISO 27001).

WHAT PEOPLE ACTUALLY DO:

Assess Risk → Draft Policy → Audit

09 / SUMMARY MATRIX

Which Cyber Domain Fits You?

CAREER MATCHMAKING

The Puzzle Solver

Loves breaking things, finding loopholes & ethical hacking.

➔ Pen Testing, Red Team, OSINT

The Defender

Enjoys real-time monitoring, hunting threats & blocking attacks.

➔ SOC Analyst, Blue Team, Network Sec

</> The Builder / Coder

Passionate about writing clean, secure code & developer tools.

➔ AppSec, Web Sec, DevSecOps

The Detective

Fascinated by crime scene evidence, logs & malware dissecting.

➔ DFIR, Malware Analysis

The System Architect

Interested in big-picture infrastructure, clouds & key systems.

➔ Cloud Sec, IAM, Architecture

The Policy Strategist

Combines business logic, tech risk management & compliance laws.

➔ GRC, Cyber Risk Analyst

// WEBINAR CLOSING & DISCUSSION

Your Cyber Journey Starts Here.

Cybersecurity is vast, dynamic, and needs all kinds of problem solvers.

[AUDIENCE Q&A TIME]

"Which cybersecurity domain sparked your curiosity today?"
